

POCKET AI CREATION STUDIO

AI Sticker Printer

A pocket-sized, inkless sticker printer. A child speaks an idea, the AI built into the printer draws it, and about ten seconds later it prints as a sticker they can peel, stick and colour in. No ink, no cartridges — ever. Battery powered, USB-C charged, and paired with the free StickerPrint app over Bluetooth.

The AI runs on the device — not in the app and not in the cloud. Artwork is generated by the model built into the printer, so content creation does not depend on a cloud service. The app is the remote control: pairing, art style and print settings.

· Voice-powered

· On-device AI

· 3 art styles

· Inkless thermal

· 6 paper rolls in box

HOW IT WORKS

idea to sticker in ~10 s

STEP 01

Speak the idea

Press the mic button and describe anything — “a teddy bear in the garden”.

STEP 02

Preview on screen

The printer’s own AI drafts the artwork on the built-in colour screen.

STEP 03

Print & colour it

One tap prints the sticker. Peel it off — or colour it in first.

IN THE BOX

retail-ready

AI Sticker Printer	1x
Thermal sticker paper rolls	6x
USB-C charging cable	1x
Quick-start guide	1x

SPECIFICATIONS

single SKU · supplied photos are of the production model

AI processing	On-device — artwork is generated by the AI built into the printer, not by the app and not in the cloud.
Print technology	Inkless thermal printing — no cartridges, no ink to restock.
Print media	Peel-and-stick thermal sticker paper, supplied in replaceable rolls.
Display	Built-in colour screen — preview the artwork before printing.
Controls	3 tactile buttons + voice microphone.
Connectivity	Bluetooth, pairing to the free StickerPrint app (iOS / Android). Range about 10 m. The app handles pairing, art styles and print settings.
Companion app	StickerPrint — free on the App Store (iOS 13+) and on Google Play. Both live; the app is the layer we rebrand for you.
Power	Rechargeable battery, USB-C charging.
Safety	Inkless thermal printing and BPA-free sticker paper. Recommended age: 4+.
Form factor	Pocket-sized and portable — built as an internal module so a new exterior never means a new machine.

WHAT YOU CAN MAKE YOURS

two tracks — we'll state which one you're on

LAYER	LIGHT CUSTOMISATION	DEEP CUSTOMISATION
Exterior	Colour, material and print changes on the existing housing.	A new exterior, designed and tooled around your brand — by our in-house industrial and structural design teams.
Companion app	Standard rebrand in 1–2 weeks — your name, icon and colours.	Deeper customisation in 4–8 weeks , scope-dependent, with a dated plan before you commit.
Packaging & manual	Custom artwork, localised manuals and gift-box configurations — available on either track.	
Internals	Unchanged. Built as an internal module — a new look never means a new machine.	
Tooling & exclusivity	Uses the existing platform housing — not exclusive .	Yours alone — an exterior you fund is never built for another client.
Confidentiality	No client list, no case studies, no mention of your identity or your design. An NDA before you send the first drawing — happily.	

CERTIFICATION

the full set ships with your quote

CE EU	FCC US	EN71 EU TOYS	CPC US CHILDREN'S	UN38.3 BATTERY TRANSPORT	MSDS BATTERY SAFETY
-----------------	------------------	------------------------	-----------------------------	------------------------------------	-------------------------------

How to read them: requirements map to your destination market rather than being a generic claim — **EN71** for EU toy channels, **CPC** for US children's products, **FCC** for the US, **CE** for the EU, and **UN38.3** / **MSDS** for shipping lithium batteries. Tell us where you sell and we will map the documents to it.

SUPPLY TERMS

confirmed figures · October 2026

MINIMUM ORDER 500 units Enough to test a market properly, not a container to gamble on.	PRODUCTION LEAD TIME 30 days Counted from order confirmation, so launch dates stay realistic.	MONTHLY CAPACITY 50,000+ Headroom to scale once the SKU proves itself.	PAPER ROLL REFILL 2 weeks Refill reorders ship in two weeks — no stock-outs.
---	---	--	--

Not published here, quoted on request: wholesale pricing tiers, tooling cost and lead time, sample terms including freight, and carton dimensions and container-loading data. These depend on your market, design and volume — send them and you get everything in one reply.

FROM FIRST EMAIL TO FIRST SHIPMENT

five steps

01 · ENQUIRY Tell us your market, type and volume Business type, destination market, first target volume — enough to quote sensibly.	02 · QUOTE Terms and documents in one email Pricing tiers, production lead time and the certification list arrive together.	03 · SAMPLE Judge it in hand A sample so your team can judge it in hand. Sample and freight terms quoted with it.	04 · DESIGN Exterior, tooling and app rebrand In-house ID/MD teams; app rebrand 1–2 or 4–8 weeks. Dated plan first.	05 · PRODUCTION 30-day lead time, 50,000+ a month Volume production with headroom; refill rolls ship in two weeks.
--	---	---	---	--

**Bring your brand.
We'll build the rest.**

A pocket-sized AI sticker printer you can launch, own and keep selling — from 500 units.
